Evening Brief

Date: Monday August 6th, 2018

Weather Summary

***** Hot and Dry Weather Intensifies by Midweek, with the potential for Holdovers *****

Warming and drying will intensify through midweek resulting in near record heat for many areas as a strong area of high pressure builds over the Great Basin. Temperatures will increase by a few degrees each day through Thursday. Temperatures will reach near records beginning on Tuesday in parts of western Nevada and over the rest of Great Basin through the middle to end of the week. Afternoon RH will drop into the single digits to low teens with poor RH recoveries, and high Haines increasing the potential for fire growth on existing fires and holdovers.

Winds expected to be light overall, and little to no additional thunderstorm activity is expected for the next several days. But the prolonged hot/dry weather will be conducive to holdovers re-emerging in areas that had recent lightning.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light Initial Attack Activity
National	5	New Fires and Acres: 11 fires 1366.9 acres; 1,709 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

A Fuel/Fire Behavior advisory has been issued for North/West Nevada into Idaho and Northwest Utah. This advisory can be found here: <https://gacc.nifc.gov/gbcc/fuels.php>

ERC's are mainly in the 80th - 97th percentile across Northern parts of NV, northern half of UT and ID, where many areas are near or just below record highs for the time of year. Wyoming ERC's are also steadily rising above the 70th - 90th percentiles. Sagebrush Live Fuel Moisture levels across most areas are near early August normals, and grasses are cured in all areas, except the highest elevations above 7000 ft in Idaho and Western Wyoming.

ERC's are still near or below the 50th percentile across the southern third of Nevada, Utah, into the AZ Strip, but even there, drier pockets are beginning to emerge, along with an occasional lightning holdover.

Much hotter and drier weather will move across the entire Great Basin this week with ERCs rising steadily in all areas. Even areas in UT, southern NV and the AZ Strip that have been wet will see some significant drying this week increasing the potential for holdovers region-wide.

Resources:

Aviation within the Great Basin

- 1 VLAT's, 4 LATs, 2 CL-415
- 20 SEATs, 2 Fire Bosses
- 9 Type 1 Helicopters / 9 Committed
- 8 Type 2 Helicopters / 8 Committed
- 22 Type 3 Helicopters

Crews Committed within the Great Basin

- 13 IHCs Committed / 0 Available
- 26 T-2 IAs Committed / 0 Available
